Orontide Quality Management Policy

Orontide is committed to the supply of competent personnel, services and products in all areas of our operations. Orontide prides itself in the commitment of maintaining a high standard of Quality management and control in all of our business processes. To this end it will

1. Comply with all applicable quality management systems and standards, including ISO9001;
2. Maintain and follow all relevant policies, procedures, systems, training, resources, and organisational structures to support and communicate effective quality management;
3. Establish and monitor objectives and targets to improve understanding of quality management issues and drive continuous process and system improvements;
4. Communicate openly and constructively with interested parties to encourage pursuit of excellence in quality control and quality assurance;
5. Identify, resolve and/or mitigate all non-conforming product and process issues arising from any operational activities performed;
6. Routinely audit and inspect the quality management system and processes, both internally and externally, to ensure ongoing implementation and development;
7. Apply a risk based approach to all work activities, using controls and resources to reduce and
8. Provide appropriate training and resources to employees to reduce the risk of quality incidents and facilitate good quality management practices;
9. Provide clear and effective communication to employees and subcontractors in relation to quality expectations, responsibilities, organizational requirements and client matters.

With the co-operation of all workers, we will strive to meet and exceed these goals and demonstrate quality management excellence to our customers.

Stewart Maddison
Chief Executive Officer
